LET'S BEGIN!

Are You Ready?

OVERVIEW

The **تعاون** (Cooperation) system is a revolutionary solution designed to connect individuals seeking assistance with skilled helpers in their community

It's a platform that facilitates a seamless collaboration between people who need tasks done and those who possess the relevant skills to perform those tasks.

Through **تعاون**, users can easily post their requirements, connect with qualified helpers, and efficiently manage tasks, fostering a sense of cooperation and mutual support within the community.

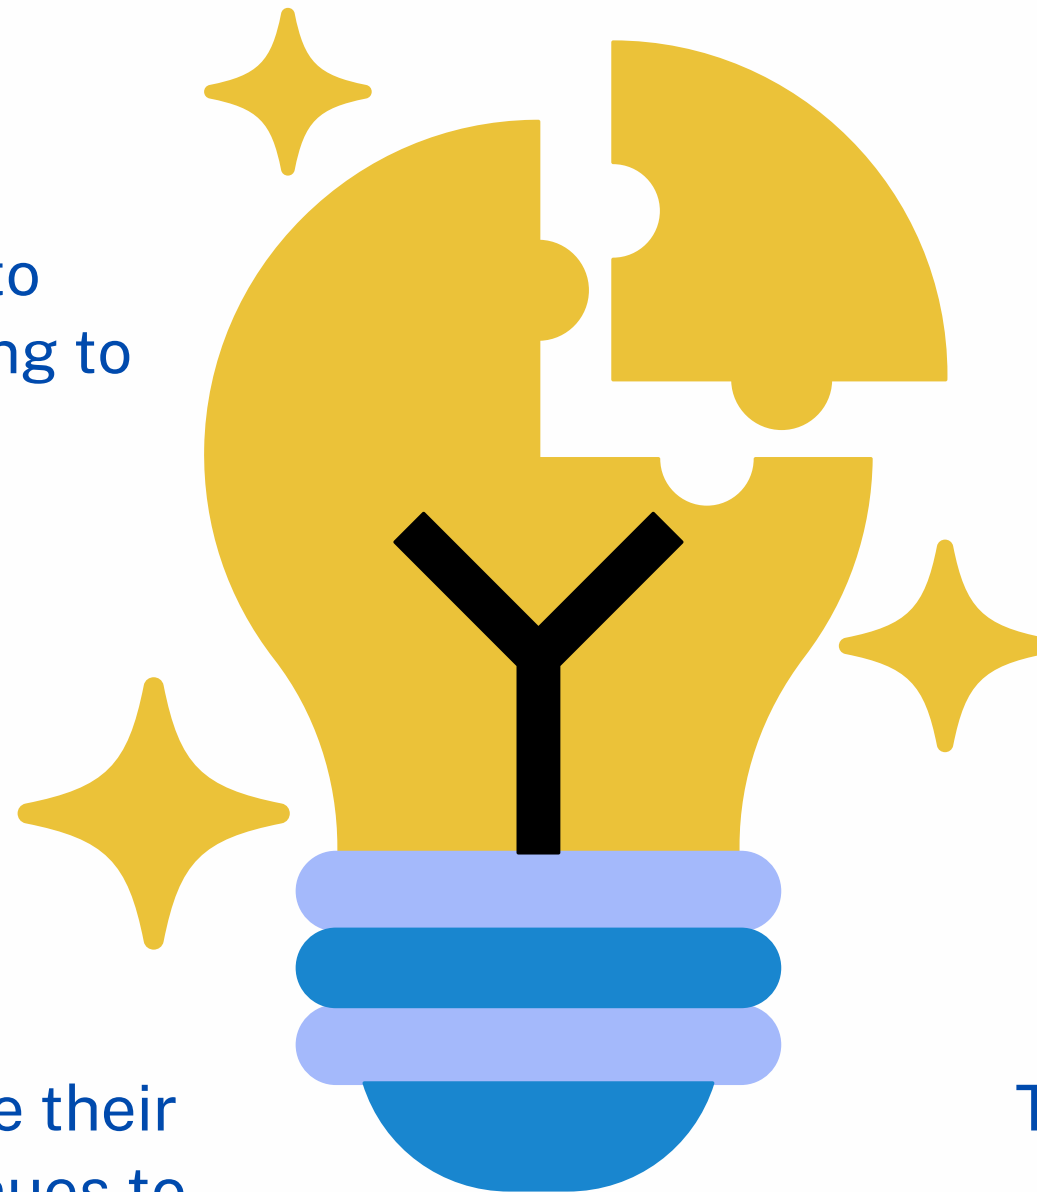

Problems

✕ **LACK OF SKILLS**

Locating individuals with the right skills to perform specific tasks proves difficult, leading to subpar outcomes and dissatisfaction.

✕ **SKILL UNDERUTILIZATION**

Skilled individuals looking to contribute their expertise struggle to find suitable avenues to offer their services.

TIME-CONSUMING ✕

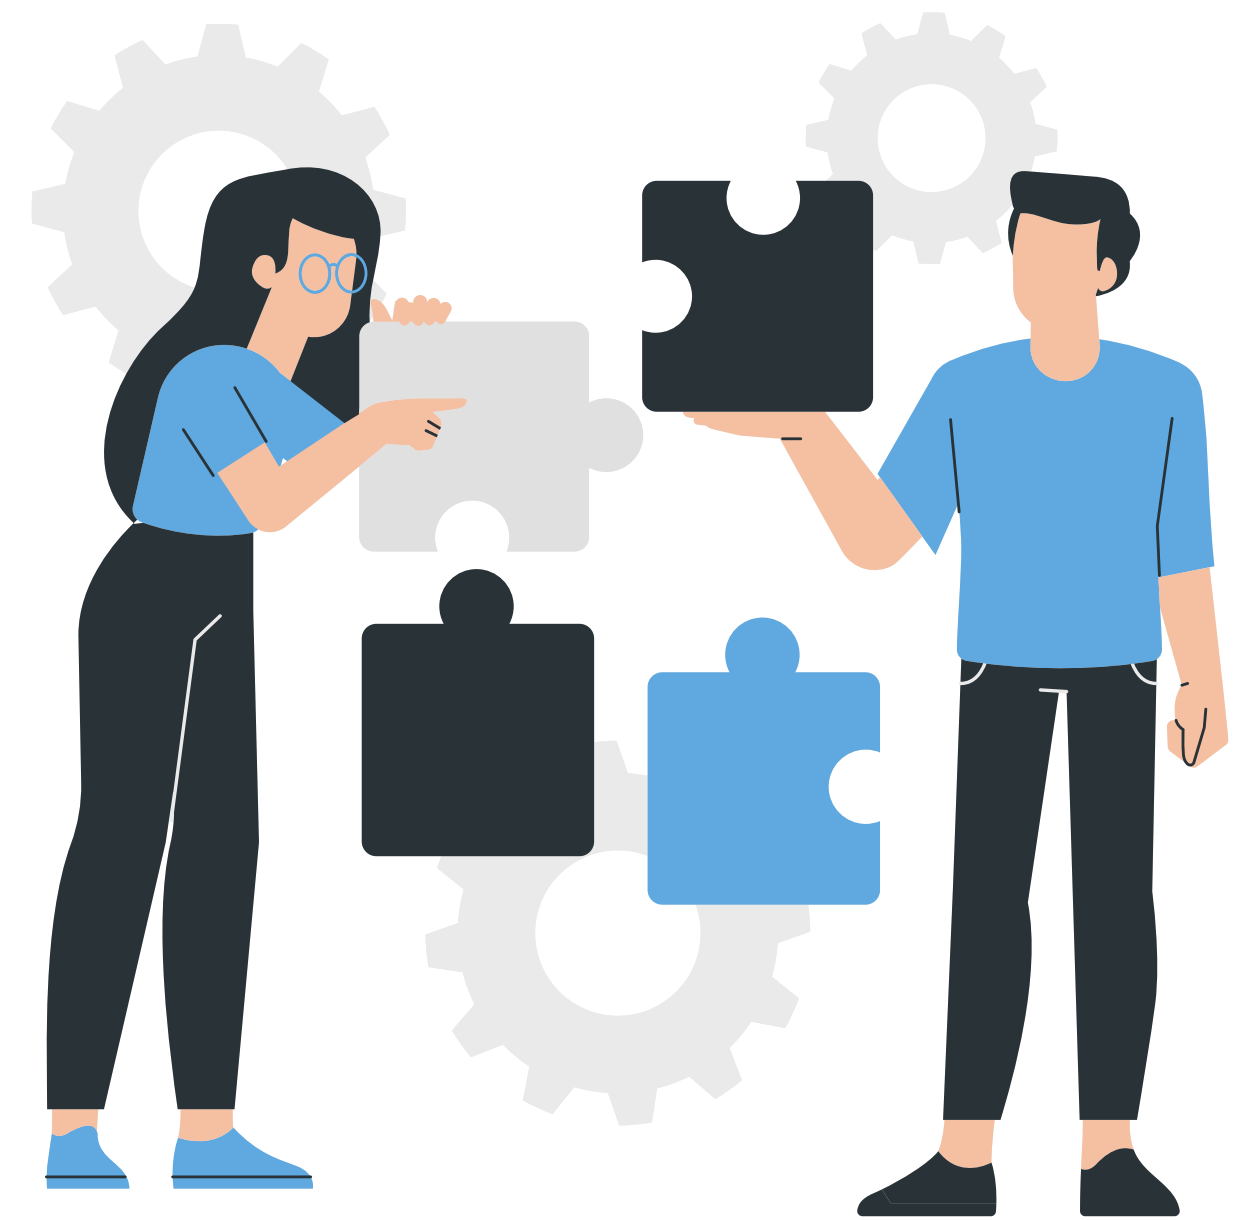

Traditional methods of finding assistance for tasks require extensive time and effort, often leading to frustration and inefficiency.

LACK OF INCOME FOR YOUTH ✕

The absence of available income opportunities to utilize spare time or earn extra income through tasks for young people.

Solutions

تعاون introduces a comprehensive and user-friendly platform designed to revolutionize the way individuals approach tasks and foster a sense of community collaboration.

Task Management

offers a streamlined platform for users to post and find tasks, match skills with task requirements.

Safe Transactions

Ensures secure interactions, transparent reviews, and reliable communication.

Youth Empowerment

Provides job opportunities and income for youth by offering them tasks suitable to their skills and availability.

Key Features Of The System

01

Task Posting&Matching

Easily post tasks you need assistance with, including descriptions and requirements. The system match task requirements with users possessing the right skills, ensuring efficient and effective task completion.

02

Real-time Communication

Built-in chat and notification features enable seamless communication between task posters and those offering their skills, ensuring clear instructions and updates.

03

Location Services

Utilizing GPS technology, the app accurately identifies task locations and matches users based on proximity, enhancing task efficiency.

04

Review and Rating

After task completion, users can leave reviews and ratings, building a trustworthy community and promoting reliability.

05

Customizable Notifications

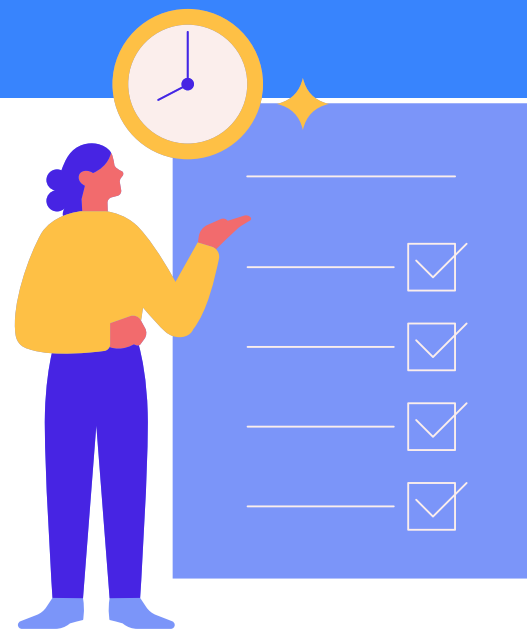

Users can customize their notification preferences, receiving real-time alerts about new tasks, messages, and updates.

06

Secure Transactions

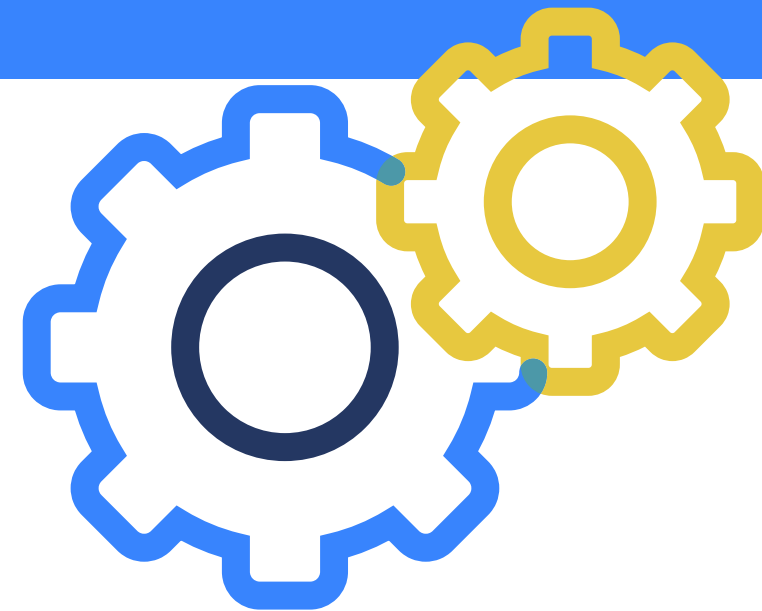

Facilitate safe payments within the app, ensuring financial security for both parties.

BENEFITS

Time Efficiency

The app streamlines the process of finding assistance, saving users valuable time in searching for help.

Convenience

Users can easily post tasks and find suitable helpers without the need for extensive searches or phone calls.

Job Opportunities

The app provides part-time job opportunities for youth, helping them earn income and gain experience.

Community Engagement

Users can actively engage with their local community by providing or seeking help.

Who is تعاون for ?

Students

Any student seeking a part-time job to earn money.

These are our target users

Adults

Any adult seeking a job to higher his earnings.
